CERTIFICATE OF CONFORMANCE

TAPCO INC. certifies that our elevator bolts are of the highest quality. They exceed the specification SAE J429k, mandated by the Industrial Fastener Institute (IFI).

TAPCO INC. elevator bolts are manufactured from 1010-1020 carbon steel or 18-8/304 stainless steel. Nuts are manufactured from 1010 carbon steel or 18-8/304 stainless steel. All zinc plating is done by hexavalent free blue chromate process that meets ROHS standards and represents approximately .001% of the total weight.

TAPCO INC. elevator bolts are Grade 2 with a Rockwell test reading of B88-100.
